

Health Invest is a company specializing in consulting, research, selection, study, development, design and construction of health and social care facilities.

What We Do

Health Invest designs and develops innovative and sustainable healthcare facilities, including Nursing Homes, Rehabilitation Clinics, and Senior Living residences, ensuring the highest quality standards and full compliance with all applicable regulations.

We manage the entire healthcare real estate development process:

- **Project Identification:** identifying strategic locations and high-potential investment opportunities.
- **Design and Construction:** developing functional, efficient, and state-of-the-art healthcare facilities.
- **Technical Consultancy:** providing technical consulting services for renovations, extensions, and regulatory compliance upgrades.

How We Do It

Sustainability and Innovation

Our facilities are designed to achieve the highest energy efficiency standards (Energy Class A4) and incorporate photovoltaic systems, heat pumps, LED lighting, and cutting-edge technological solutions to ensure environmental sustainability and operational efficiency.

Strategic Collaboration

We work closely with operators, investment funds, and investors, providing technical and design consultancy, professional support, and strategic advisory services, including assistance with mergers and acquisitions (M&A).

Delivering Real Impact

Every project is designed to improve quality of life, enhance the well-being of residents and patients, and meet the evolving needs of society through sustainable, people-centred healthcare environments.
